SUMMARY

QA Automation Engineer with 5+ years of software testing experience across web and mobile applications, including 2+ years designing, building, and maintaining automated test suites. Strong foundation in manual testing, regression, and agile QA practices, with a proven focus on improving test coverage, efficiency, and release quality.

EDUCATION

Bachelor of Science in Computer Engineering — March 2020

University of Cebu – Banilad Campus

TECHNICAL SKILLS

Test Automation & Frameworks:

Selenide (Java, custom test framework), Playwright (Web & API automation), Selenium (Python), Katalon Studio (Web & Mobile), Appium (experimental)

Programming Languages:

Java, Python, JavaScript

Web & Mobile Testing:

Web UI Automation, API Automation, Manual Testing, Regression Testing

Dev & QA Tools:

Postman, IntelliJ IDEA, PyCharm, VS Code

AI-Assisted Productivity:

GitHub Copilot, ChatGPT / Codex, Claude, VibeKanban (used for test scripting, refactoring, and workflow efficiency)

JOB EXPERIENCE

QA Automation Engineer – Desygner

Jan 2024 – Present

<https://desygner.com>

- Designed, enhanced, and maintained automated test suites using Selenide (Java), improving regression reliability across web applications
- Monitored daily regression runs, investigated failures, and stabilized flaky tests to ensure consistent CI results
- Performed targeted manual and exploratory testing to validate edge cases and support automation gaps
- Conducted code reviews to enforce test quality, consistency, and maintainability standards
- Leveraged AI-assisted tools to accelerate test development, refactoring, and reduce redundant test logic
- Supported frequent releases by ensuring stable regression coverage and early defect detection

QA Engineer (Contract / Part-Time) – TopApps Inc.

Aug 2022 – Dec 2025

<https://topappsdev.com>

- Built and maintained automated tests for web applications using Playwright, supporting regression and feature validation
- Contributed to defining and applying QA processes, standards, and test strategies across multiple projects
- Collaborated with developers and product teams to identify, track, and resolve defects throughout the SDLC
- Supported quality metrics definition and participated in audits to improve overall release confidence

Software Test Engineer – White Label Services 2014 Inc.

May 2021 – July 2022

<https://position1seo.co.uk>

- Created detailed test plans, scenarios, and procedures
- Analyzed test results and collaborated with developers to resolve issues
- Acted as a final quality gate prior to release

Test Engineer – Kyocera Document Solutions Development Philippines, Inc.

Nov 2020 – May 2021

<https://www.kyoceradocumentsolutions.com>

- Analyzed system requirements and authored test specifications and test cases
- Executed test cases, logged results, and documented defects with clear reproduction steps
- Conducted peer reviews of test cases and test results to ensure accuracy and coverage
